COGNEX MOBILE BARCODE SOFTWARE DEVELOPMENT KIT (SDK)

Simple, enterprise-grade barcode scanning for mobile devices

Whether developing a barcode reading application for the front office, light industrial use, or harsher warehouse and factory floor environments, the Cognex Mobile Barcode Software Development Kit (SDK) provides enterprise-grade barcode scanning in a unified solution.

Our software decoding library offers unmatched performance and value for a broad range of barcode scanning applications and has been optimized for today's smart devices. With support for most operating systems and cross-platform tools like Cordova, Xamarin, React Native, Native Script, and even web browsers, the SDK can be used in virtually any hardware and programming environment.

# Broad range of symbology and platform support

The Cognex Mobile Barcode SDK supports iOS devices including the Apple® iPhone®, iPad®, and iPod touch®, most Android® smartphones and tablets, as well as Windows, Linux, and embedded systems. It can read over 20 different 1D and 2D barcode symbologies used across a wide range of industries.

- 1D Codes: UPC/EAN/JAN, Codabar, Code 11, Code 25, Code 32, Code 39, Code 93, Code 128, GS1 DataBar, Interleaved 2 of 5, MSI Plessey, Telepen
- 2D Codes: Data Matrix, QR, Micro QR, PDF417, MicroPDF, MaxiCode, Aztec Code, DotCode
- Postal Codes: POSTNET, PLANET, Intelligent Mail Barcode, Australian Post, Royal Mail

The Cognex Mobile Barcode SDK can be used with any supported device, including:

- Smartphone and tablet cameras
- MX-100 Series mobile barcode reader
- MX-1000 and MX-1502 Series mobile terminals
- Windows and Linux systems with USB cameras
- Most web browsers (no application needed)

## Easy to use

With the Cognex Mobile Barcode SDK, it is no longer necessary to develop separate applications and manage multiple software and hardware solutions for mobile device barcode reading. The SDK offers developers a robust set of tools in a single solution, allowing for maximum control over the user experience. It provides a high-level, simple to use interface for device management, whether using a smartphone or tablet camera, or a ruggedized mobile terminal.

## Reliable mobile barcode reading performance

The Cognex Mobile Barcode SDK is designed to provide fast and reliable barcode reading on smartphones, tablets, and MX-100 Series mobile barcode readers for field service, courier and parcel delivery, and logistics applications. For damaged codes, challenging lighting conditions, or harsh environments, the SDK can leverage the power of the ruggedized, highperformance MX Series mobile terminals.

## **Couriers and Parcel Delivery**

Flexible design allows a common mobile app on either smartphones or rugged MX mobile terminals for high speed barcode reading of packages and parcels.

#### Field Service and Utilities

Easily integrates scanning capabilities to existing mobile phones to read a variety of 1D and 2D codes on work orders, replacement parts, and installed equipment.

#### **Logistics and Transportation**

Develop mobile applications to read barcodes on products, product packaging, and shipping labels for warehousing or freight delivery.

SPECIFICATIONS	
Operating Systems	iOS, Android, Windows, Linux, MacOS. Contact us for others.
Supported IDEs	Xcode,® Android Studio, Visual Studio
Development Languages	C, C++, Objective C, Swift, Java
Frameworks	Xamarin/Xamarin.Forms, Cordova, Ionic, React Native, NativeScript
Supported Devices	iOS (iPhone, iPod, iPad), Android (most phones and tablets), Windows (tablets, servers, desktops), Linux/embedded systems including Raspberry Pi
Standard Formats (Parsers)	UID/IUID, IBST, HIBC, GS1, AAMVA, SCM
Supported Symbologies	UPC/EAN/JAN, Codabar, Code 11, Code 25, Code 32, Code 39, Code 93, Code 128, GS1 DataBar, Interleaved 2 of 5, MSI Plessey, Telepen, Data Matrix, QR, Micro QR, PDF417, MicroPDF, MaxiCode, Aztec Code, DotCode, POSTNET, PLANET, Intelligent Mail Barcode, Australian Post, Royal Mail

# COGNEX

Companies around the world rely on Cognex vision and barcode reading solutions to optimize quality, drive down costs and control traceability.
